

PROTECTIVE WRAPPING

Product Information

Vita-Pack protective foam wrapping offers low cost surface protection without scuffing, scratching or sticking to delicate surfaces. It is an ideal protective wrap or interleaving layer with tough tear strength properties.

Due to its unique cellular structure Vita-Pack is both extremely flexible and durable providing excellent insulation and resistance to moisture penetration, protecting contents from moisture damage in humid climates as well as abrasion and impact damage in transit.

The uniform surface of Vita-Pack further guarantees to protect polished surfaces from abrasions, scratching and marking often left by traditional bubble mediums as well as being a cost effective option. The product is available in roll widths of 1 000 mm to 2 000 mm and can also be cut into strips with a minimum strip width of 100 mm.

Product Description	Packaging	Thickness (mm)	Roll Width (mm)	Meters per Roll
Vita-Pack	Roll	1	1 000	200
Vita-Pack	Roll	1	2 000	200
Vita-Pack	Roll	2	1 000	200
Vita-Pack	Roll	2	2 000	200
Vita-Pack	Roll	3	1 000	150
Vita-Pack	Roll	3	2 000	150
Vita-Pack	Roll	5	1 000	100
Vita-Pack	Roll	5	2 000	100

PROTECTIVE WRAPPING

Specifications

APPLICATIONS

Protective packaging.

WEATHERABILITY

Requires protection against UV degradation if left exposed to sunlight for extended periods.

TOXICITY

Negligible. Gases given off in the event of a fire are non toxic.

CHEMICAL RESISTANCE

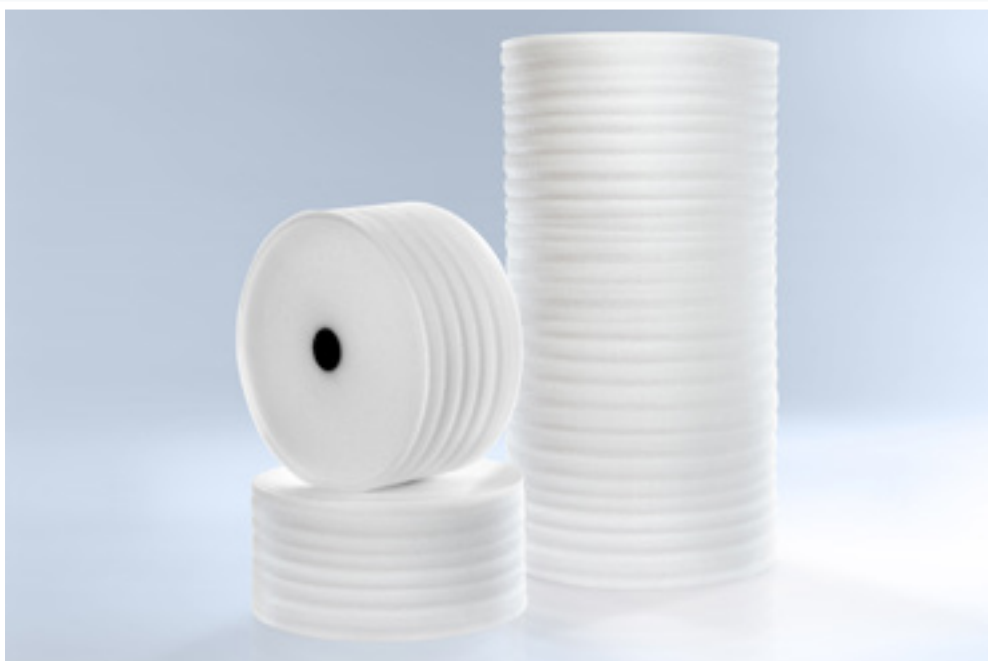

Resistant to most common acids and chemicals.

WATER ABSORPTION

Minimal, due to closed-cell structure, less than 2%.

Features & Benefits

- » Moisture resistant
- » Elastic cushioning
- » Non scratch / water repellent
- » No tack or condensation
- » FDA food approved
- » Chemical resistant
- » Non toxic
- » Durable
- » Anti-bacterial
- » Hygienic
- » Convenient
- » Good tear strength
- » 100% Recyclable

PROTECTIVE LAMINATE PACKAGING

Product Information

Vita-Pack protective foam packing is a composite product that combines the elastic cushioning, flexibility and scratch resistant properties of the Vita-Thene product with the tare resistant, moisture absorbent or moisture resistant properties of the Kraft, Spunbond and LDPE / HDPE substrate laminates.

The humidity absorption properties of paper Kraft prevents “tacking” and “sweating” against polished surfaces, especially evident in humid conditions.

The fine tissue softness of Spunbond provides added protection. It is slightly moisture absorbent (less than 2%), preventing sweating and resultant tacking in humid environments.

The “Knurled” pocketed zones created by the HDPE adds strength, eliminates blemishes and ensures scratch free surfaces during transit. Due to its reduced surface contact area the build up of condensation is prevented, eliminating sweating and resultant tacking.

The product is available in roll widths of 1 000 mm to 2 000 mm and can also be cut into strips with a minimum strip width of 100 mm.

Product Description	Packaging	Thickness (mm)	Roll Width (mm)	Maximum Meters per Roll
Vita-Pack - K/S/L/H	Roll	2	1 000 / 2 000	195
Vita-Pack - K/S/L/H	Roll	3	1 000 / 2 000	145
Vita-Pack - K/S/L/H	Roll	5	1 000 / 2 000	95

K - Kraft | S - Spunbond | L - LDPE | H - HDPE

Vita-Pack	Pack	25	1 000 / 1 950	2 000	
Vita-Pack	Pack	30	1 000 / 1 950	2 000	
Vita-Pack	Pack	35	1 000 / 1 950	2 000	
Vita-Pack	Pack	40	1 000 / 1 950	2 000	
Vita-Pack	Pack	45	1 000 / 1 950	2 000	
Vita-Pack	Pack	50	1 000 / 1 950	2 000	

Product Information

Vita-Pack pads are heavy duty laminated foam products which provides excellent padded protection for heavy work and recreational areas. The light weight, flexibility and cushioning property provides impact resistance in low overhead areas of the work place, practice mats in gymnasiums or roll bar covers in motor sport and kiddies play areas.

Available in rolls or can be fabricated to meet customer protection requirements. Fabricated applications for carton liners of shock sensitive computers or electronic appliances proves superior, as Vita-Pack pads are crush resistant due to its elastic foam structure.

Suitable for the following applications:

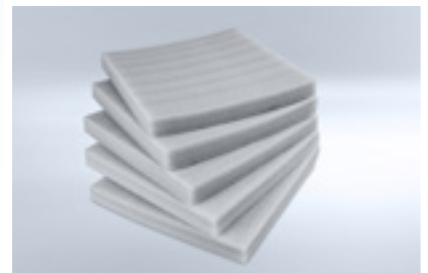

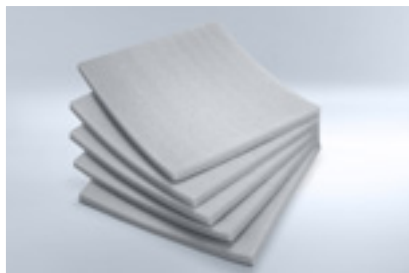

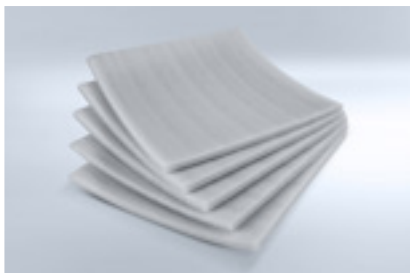

- » Rugby posts
- » Cartons and cooler box liners
- » Karate mats
- » Shock sensitive appliances
- » Gym / aerobics mats
- » Playrooms and jungle gyms
- » Trampolines spring protection
